EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended to correct an obvious spelling mistake. An informal examiner's amendment is proper to correct a spelling error under MPEP §1302.04.

On Page 30, Lines 6 to 16, replace ¶[0059] as follows:

[0059] The lips shape patterns shown in Fig. 10 may be stored as for example pre-captured default patterns. Instead, lips shape patterns collected by the user may be stored. Lips shape patterns may be patterns of which the [mouse] mouth is closed (silence state) or patterns of which a particular word such as "A" or a particular sentence such as "KON-NICHI-WA" is being pronounced. When the word "A" is pronounced, its lips shape pattern is a still picture. When the sentence "KON-NICHI-WA" is pronounced, its lips shape pattern is a moving picture.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 19 are allowable because the prior art of record does not disclose or reasonably suggest a combination of first and second conversion means for converting first and second picture information of first and second users, where first and second main bodies have first and second display screens and a connection mechanism for connecting the first and second main bodies, and storing picture patterns and lip shape patterns of each of a plurality of people and character information corresponding to a picture pattern. *Sudeka et al.* discloses an apparatus with first and second main bodies having first and second display screens and a connection mechanism for connecting the first and second main bodies, but is directed to translating sentences rather than picture patterns, lip shapes, and corresponding character information. *Hayashi et al. (JP '250)* discloses converting picture patterns of a first speaker's lips into converted character text information, so that a hearing-impaired person and a non-hearing impaired person can communicate, but omits storing picture patterns and lip shape patterns for each of a plurality of people.

Applicant's Specification, Page 30, Line 22 to Page 32, Line 14: Figures 10 and 12: ¶[0060] - ¶[0062], discloses an "initial setting" for a picture of the lips of the non-impaired person to select a pattern that is most similar to the lips of the non-impaired person. Comparing Figures 10 and 11 makes it clear that the conversion table identification selected for a lip shape of a non-impaired person from a plurality of

Art Unit: 2626

persons is distinct from the lip picture pattern and its corresponding character information. The Specification, Page 10, Lines 1 to 23: ¶[0019], discloses that by storing picture patterns and lip shapes of each of a plurality of people, pictures of users can be more accurately recognized, the conversion process can be more accurately performed, and the occurrence rate of conversion errors can be decreased. The prior art of record does not disclose or reasonably suggest a combination for converting first and second picture information from first and second main bodies having a connection mechanism, further comprising storing picture patterns and lip shape patterns for each of a plurality of people so as to enable a hearing-impaired person and a non-hearing impaired person to communicate more accurately.

CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
